SOUTHWESTSOLUTIONSGROUP

Material Handling Storage Solutions

Understanding how to be more efficient and productive with your company's resources can drastically increase bottom line profits. Southwest Solutions Group designs and installs industrial material handling storage systems to optimize the flow of materials through your facility and increase efficiency while decreasing waste.

Mobile Bulk Racks

By limiting aisle space, heavy duty mobile bulk rack systems can either free up floor space or double your current storage capacity.

Vertical Lift Module (VLM)

Vertical lifts make use of valuable overhead space while optimizing productivity and inventory control. VLMs reduce lost parts, stock-outs, and surplus inventory.

Mezzanines

Add valuable space to your facility with a mezzanine system. They are strong enough to hold the heaviest loads and flexible enough to relocate when needed.

Vertical Carousels

Vertical carousels boost small part picking productivity by up to 60% and automate inventory management with dynamic updates for every pick/put.

High-Density Shelving

Stationary aisles use up to 60% of warehouse space. Repurpose this wasted space with increased capacity or revenue-generating activities without losing inventory access.

Vertical Reciprocating Conveyors

Safely and efficiently move materials between levels while saving space. Built for heavy-duty use, they streamline workflow and reduce manual handling.

Material Handling Storage Solutions

Wire Partition Cages

Protect equipment and materials with modular wire partition security enclosures. These cages are easy to assembly, install, and relocate when needed.

In-Plant Modular Office

Create office space without expanding the walls of your facility. Save costs by only heating and air conditioning the office portion of your warehouse with an in-plant modular office.

Compact Pallet Racks

Cut your floor space usage in half by mobilizing pallet rows at the push of a button while maintaining 100% accessibility.

Specialty Carousels

Specialty vertical carousels create automated storage solutions for heavy or difficult to handle items such as textiles, tires, wire spools, print cylinders, and more.

Industrial Shelving

Industrial Shelving provides versatile, heavy-duty storage for your warehouse. Additionally, optimize the flow of materials through your facility and increase efficiency.

Sheet Metal Racking System

Streamline sheet metal storage and handling with automated tower systems that deliver heavy materials directly to a safe, ergonomic working height.

Bar Stock Storage Systems

Reclaim valuable floor space and improve material flow with automated VLS systems designed to organize long stock in a compact, high-density footprint.
