SOUTHWESTSOLUTIONSGROUP

Military Storage Solutions

Our country's security and defense depend on our armed forces being ready for any challenge at any moment. By designing and planning effective military facilities with our custom solutions, you can lower costs while improving personnel safety and efficiency.

High-Capacity Bulk Racks

Maximize the storage of bulky military gear and equipment in less space with high capacity racks. Racks are designed to ensure quick access and promote security of stored items.

Automated Storage Systems

Automated storage systems maximize overhead space, boost picking productivity, and improve inventory control, reducing lost items, surplus inventory, and retrieval times.

Readiness Gear Cabinets

Store combat and deployment readiness gear efficiently in high security cabinets so they can be retrieved quickly at a moment's notice.

Parachute Storage Racks

Save space and store parachutes more efficiently with adjustable racks that improve accessibility and allow soldiers to quickly find and retrieve what they need.

Cabinets and Tables

Cabinets and tables arrive assembled for quick installation and relocation, eliminating the need for subcontractors, fumes, and dust.

Weapons Storage

Heavy-duty, secure armory weapons racks provide secure and durable storage for guns, ammo, optics, radios, and other critical military gear.

SOUTHWESTSOLUTIONSGROUP

Military Storage Solutions

Compact Pallet Racks

Stationary aisles take up as much as 60% of warehouse floor space. Convert that wasted space into more pallet storage positions without sacrificing access.

Vending Machines

Vending machines store, track, and automate inventory management, fully approved for U.S. government and military use.

High-Density Shelving

Reduce floor space by eliminating wasted unused aisle space. Free up floor space for more important operations or double your storage capacity in the same footprint.

Mezzanines

Add valuable space to your facility with a mezzanine system. Strong enough to hold the heaviest loads and flexible enough to relocate when needed.

Wire Security Partitions

Security partitions offer secure, visible, and ventilated protection for weapons, gear, equipment, and more!
