Stainless Steel & Powder Coat Metal Casework

Stainless steel cabinets & powder coat metal casework are the premier storage solution for healthcare facilities and other applications where sanitation is a top priority. Both solutions are available in various models to suit the varying needs of operating rooms, surgical suites, laboratories, pharmacies, and other healthcare applications.

Stainless Steel Casework

Prevent the spread of infections and microbial contamination with stainless steel modular casework. Contains over 30% recycled content.

Stainless Steel Wall Cabinets

Safely store supplies in your operating room at the point of need while creating protection from contamination with air-tight doors.

Moisture Resistant Cabinets

These cabinets feature encased drawer glides that enable steam cleaning of bacteria without harming the cabinet.

Stainless Steel Catheter Cabinets

Store various sized catheters and supplies at the point of use for fast accurate retrieval.

Stainless Steel Counter Cabinets

Stainless cabinets are impervious to water, eliminating mold and harmful bacteria growth. Configured to meet your unique needs.

Modular Steel Cabinetry

Available in a mixture of both durable and aesthetically pleasing cabinet configurations. Modular power components integrate into lab cabinets construction with lifetime warranty.

SOUTHWESTSOLUTIONSGROUP

Stainless Steel & Powder Coat Metal Casework

Modular Crime Lab Casework

Crime Lab cabinets offer a sterile environment to protect evidence from contamination. They are made of reconfigurable components that can be easily adjusted as needed.

Laboratory Benches

These powder-coated steel cabinets have stainless steel drawer fronts and chemical epoxy resin tops, integrating gas, vacuum, water, data, and electrical lines for complete flexibility.

Modular Lab Casework

Design your lab with ergonomic lifts, casters, overhead shelves, pullout work surfaces, keyboards, and various sinks, faucets, valves, and safety equipment.
